be an artist of own inspirations

Artis sola domina necessitas – Necessity is the only mistress of art

Indefinitely MERYart may meet all your needs and expectations. This is up to you to decide on its layout and inspiration. MERYart has resulted from the idea of introducing some art into medical atmosphere of in-hospital rooms to upraise the spirits of recovering patients. MERYart is a combination of high definition permanent imprint on a Corian® panel by DuPont®. The breathtaking result is outrageous depth of colors, graphics and light reflected in them.

MERYart is equipped with all required medical gas outlets, electrical, IT sockets and lighting including AmbientLight and ControlLight.

art and functionality

MERYart, like every unit in MERY family, can be manufactured as single-positional horizontal or vertical or multi-positional. Nevertheless and to our best knowledge and experience MERYart is most presentable if exhibited single-positionally. It combines functionality and convenience with standards suitable for in-hospital rooms. This unit has been particularly appreciated by plastic surgery clinics, maternity and labor wards in fact everywhere medical technology meets beauty and imagination.

MERYart may be equipped with:

- 2 medical gas outlets of vacuum and oxygen,
- 4 electrical sockets including equipotential bonding pins,
- telephone and a nurse call system socket,
- direct, indirect and full LED or fluorescent light.

Our focus is on expanding imagination to conceptualize and create new models of MERYart. With us imagination is unlimited.
